# INTERNATIONAL SEARCH REPORT

Information on patent family members

International application No.

PCT/AU2004/001844

This Annex lists the known "A" publication level patent family members relating to the patent documents cited in the above-mentioned international search report. The Australian Patent Office is in no way liable for these particulars which are merely given for the purpose of information.

Patent Document Cited in Search Report		Patent Family Member	
WO	1998/024893	AU	57022/98
		EP	1500329
CA	2273194	KR	2000057347
EP	0942968	US	2003070185
Due to data integration issues this family listing may not include 10 digit Australian applications filed since May 2001.

# INTERNATIONAL SEARCH REPORT

International application No.  
PCT/AU2004/001844

## Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
  
2. ☒ Claims Nos.: 1, 4, 8, 14, 15 and 19 (partially)  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:  
The scope of the term *humanized C5aR* is so unclear that a meaningful search covering the entire scope of the term could not be carried out. The specification states that said term encompasses a non-human C5aR that has been modified so as to introduce or enhance at least one functional characteristic of native human C5aR. Therefore, the term potentially encompasses a large and indeterminate number of modifications that cannot be routinely determined or searched based on the present disclosure. Thus the present claims have been searched only so far as they relate to a transgenic non-human wherein the humanized C5aR is an endogenous C5aR wherein at least one extracellular or intracellular domain is replaced with the corresponding human C5aR domain.
  
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)

## Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
  
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.
